PROJECTS

1. Calculator

- Objective: To develop a simple and user-friendly calculator application.
- Created a functional calculator capable of performing basic arithmetic operations such as addition, subtraction, multiplication, and division

2. Interactive Quiz

- Objective: To create an engaging and dynamic interactive quiz application.
- Description: Developed a quiz app that presents multiple-choice questions to users, tracks their answers, and calculates the final score

3. Currency Converter

- Objective: To develop a real-time currency conversion tool.
- Description: Designed a currency converter app that allows users to input an amount and select different currencies for conversion.

OBJECTIVE

To contribute to impactful projects by building scalable solutions and leveraging expertise in advanced analytics and AI.
